GRECOTEL HOTELS & RESORTS

Dedicated to mastering the craft of welcoming luxury in the hospitality industry, Grecotel Hotels and Resorts, the leading hotel chain in Greece, delivers sophisticated lifestyle experiences for travelers in the country’s most beautiful destinations.

Inspired by its superb beachfront location, each of the 30 luxury hotels and resorts in the Grecotel collection all over Greece, is a unique architectural experience in itself and a paradise of opulent amenities, gourmet restaurants and luxurious, well thought-of details, all embodying the essence of the genuine Greek hospitality.

Grecotel is part of the N. Daskalantonakis Group of Companies, which includes among others city and resort affiliated hotels, the Agreco traditional farm and line of products from Crete and the Danilia traditional village and museum in Corfu. Having been awarded with over 2000 international awards by guests and the most prestigious international tourism organizations, Grecotel Hotels and Resorts are mostly proud of its people: reliable, kind and welcoming, they have been our loyal companions during our 40 year journey in Greece’s most exciting luxury travel story.

A TRIBUTE TO HOSPITALITY

The story of the largest and most successful Greek luxury hotel group is above all personal. Nikos Daskalantonakis started his long journey in tourism from his birthplace of Rethymno, Crete. Nikos Daskalantonakis, along with his older brother Takis, looked further ahead, realizing that blue skies and sparkling seas were only enough to attract visitors’ interest: high standards of quality and responsiveness to tourists’ needs were the key to keeping them and to the future. And it’s this vision that powers the Grecotel’s unique concept of hospitality that is rooted in Greek culture and style.

On entering the tourism business, Nikos Daskalantonakis adopted a philosophy that has
remained unchanged for 40 years: to employ the most highly-qualified professionals; to offer genuine Cretan hospitality; to be an innovator in tourism; to invest and improve the infrastructure in the luxury hotel market.

Today, Grecotel properties occupy prime locations around Greece and are far more than just resorts—they are destinations. Grecotel resorts on the islands of Crete, Corfu, Rhodes, Kos, Mykonos, and in the prime mainland regions of Sounio south of Athens, Halkidiki in the north and Kyllini in the legendary Peloponnese have their own character, from ultra-luxury boutique hotels to magnificent resorts on sprawling estates and family-friendly or all-inclusive holiday-lands for quality vacations or romantic hideaways and luxurious spas. But they all share three things in common: a quality environment, signature service, and singular locations.

It has been more than 40 years since Nikos Daskalantonakis laid the foundations for Greece’s premiere luxury resort chain when he opened his first hotel on Crete. Today, Grecotel is a destination-venue for people from all walks of life who through the years have become members of the family of guests who have enjoyed Grecotel’s signature hospitality. Through the years, Grecotel has created memories for you and you have helped us reach our milestones.

AWARDS & RECOGNITION

- 300 Sea Turtle nests in Crete protected in cooperation between ‘Archelon’
- Travelife - Gold Awards
- TUI ECO-RESORT eco-label for quality tourism product respecting local natural and social values

</table>
The hotel is built on the verdant private peninsula of Kommeno in a landscape of stunning natural beauty, just 12 kilometers from the city of Corfu. A great advantage of the summer holidays at Corfu Imperial is the three sandy beaches, awarded with the blue flag, which faithfully follow the European Union's directives on water quality, safety and respect for the environment. You will be hosted in impressive luxurious rooms, suites, bungalows and villas with private garden and swimming pool. All of the hotel's rooms offer views of the sea or the garden. They are located in the main building or in a bungalow, surrounded by gardens leading to the sea. Corfu Imperial's dining areas combine an excellent seafront location with a menu of award-winning chefs. Unique experiences of luxurious care are offered in an ideal spa environment. The shops of the premises include a jewelry shop, a boutique and a hair salon. The hotel's entertainment team offers a variety of activities, ranging from morning gyms, aerobics and beach games to dance lessons, evening performances and musical evenings from the rich tradition of the island.

Location

THE HERSONISOS NAMES

The cosmopolitan peninsula of Kommeno is just 10 km from the dream town of Corfu. An oasis of tranquility and beauty that can offer you everything you need to experience what you dream about in your summer vacation. Three unique hotels of Grecotel dominate the most beautiful parts of the peninsula, giving the best view of Corfu, excellent choice of accommodation and sophisticated service! Of the great trumpet is definitely the beach of Kommeno with the emerald waters and the unique view of the chapel of Ypapanti, which connects with the island with a thin islet of land.
WELCOME NOTE FROM GENERAL MANAGER

Today the situation of the Natural Environment demands immediate action worldwide. In Grecotel, the largest hotel chain in Greece, we believe that the quality of our hotels is equal to the quality of the holidays' environment. Thus, in 1992 we introduced a programme of environmental management and protection by establishing a professional Environmental Department in the Grecotel’s Head Offices.

By developing Environmental Management and Sustainability procedures, the hotel defines all the environmental aspects of its operations and has established policies and programmes that aim to continuously improve its performance and results.

The hotel aims through the goals setting, the programs implemented, the procedures performance evaluation and through revising measures, aims and objectives.

Now Grecotel Corfu Imperial Exclusive Resort has reached a milestone in the release of our first sustainability report. This report reflects the best examples of our company and areas of growth.

We see sustainability as an integration of economic, environmental and social considerations as well as corporate values. We incorporate these values into our business strategy.

Without a doubt, our most valuable resource is our people our stuff. In 2015, our employees spent a lot of hours in informal and formal training.

The training Programme was planned in a way that would meet all the important factors in our philosophy, managing sustainability, guest satisfaction, staff improvement, community progress.

This report represents a first step in our journey to becoming an even more sustainable company. You will hear and see a lot more from us in the coming years as our efforts will continue. We will be expanding the report to include more information on our operations. We also will provide regular updates on our performance.

Thank you for spending some time to have a look at our Sustainability Report and using this opportunity to learn more about Grecotel Corfu Imperial Exclusive Resort.

CORPORATE GOVERNANCE

Corfu Imperial is managed by the general manager Mr Efstathios Savvidis and the management team.

A sustainability committee is led by Mrs. Markati Elpida and has the responsibility for all the environmental actions and management.

Human Resources Manager Mr. Pantazis Kantaros has the responsibility for managing the welfare and labor standards of all employees and for managing human rights.

Human Resources Manager is also responsible for

- managing the business supports,
- communicating and working with the local community, local business and
- protecting local culture and traditions

All employees regularly report the Top Management on their areas of responsibility.

- Exchange, Credit cards, Porter, newspapers
Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs. Sustainable development encompasses three dimensions: economic, environmental and social.

THREE DIMENSIONS OF SUSTAINABILITY
Integration of the economic, social and environmental dimensions is key to achieving sustainable development.

- **Environmental Sustainability:**
  We are living within the means of our natural resources. To live in true environmental sustainability we need to ensure that we are consuming our natural resources, such as energy fuels, land, water etc, at a sustainable rate.

- **Social Sustainability:**
  Social sustainability is the ability of society, or any social system, to persistently achieve a good social well being. Achieving social sustainability ensures that the social well being can be maintained in the long term.

- **Economic Sustainability:**
  Economic sustainability requires that a business uses its resources efficiently and responsibly so that it can operate in a sustainable manner to consistently produce an operational profit. Without an operational profit a business cannot
sustain its activities. Without acting responsibly and using its resources efficiently a company will not be able to sustain its activities in the long term.

Organizational Sustainability
Corfu Imperial on a daily basis to develop its working plan in a way that is progressively more responsible towards the environment and the community. For this purpose, we create the “Green team”. The team follows the environmental Programme and the commitments of the general Grecotel policies. It focus on three main areas: environment, society and human resources.Green Team is responsible to ensure the implementation of environmental measurements and initiatives for each hotel
- The Environmental Manager is responsible for the proper function of the Environmental Program and to communicate this policy to all staff and customers.
- The entire staff is responsible to promote, support and implement the Environmental Program through their daily work.
- The Managing Director is committed to provide all the necessary means for the proper operation and the constant improving of the Environmental Program.

ABOUT THIS REPORT
Sustainable report aims to provide accessible and comparable information in Grecotel’s practices on its economic, environmental, and social impacts, and hence its contributions to positive or negative towards the goal of sustainable development.
Through this process, Grecotel identifies its significant impacts on the economy, the environment, and/or society and discloses them in accordance with a globally-accepted standard.

This is the second public sustainability report of Corfu Imperial and covers 2017 season (reporting periods are from opening to the closing day). The report outlines our management practices, as well as our company targets and achievements for each area of interest (environment, society and economy). In each area, through the application of dedicated policies (see Annex), we attempt to maximize the benefits of our operation and share the value created.
Many of the case studies, highlights and targets are coming from the central offices of the group. Nevertheless Corfu Imperial is a special product, is a place that works out through wonderful people dedicated to their vision about the environment, the local community, the people who worked with and the quests
Our sustainability team, working with experts, identified the topics covered and the performance indicators collected are in line with industry standards and recognized reporting benchmarks, e.g. the T.U.V Austria. We believe this report provides a fair and accurate representation of our sustainability performance.

The report is based on the three most important modules: clients, employees, results. Combining these three elements guarantees coherent actions and ensures pro-effective organizational culture.
In the first module concerning clients attention is focused on hospitality, exceeding mediocrity and empathy. An important element is innovation which is supposed to form the basis for the Hotel’s competitive advantage.
In the second module the central figure is an employee. Therefore the stress is on the environment favouring development of employees’ competences. The key words are here: trust and mutual respect. Openness and transparency are to be achieved through training and peer care.
The last module points to efficiency, innovations and selling techniques.
### 2017 SUSTAINABLE PERFORMANCE HIGHLIGHTS

## SUSTAINABILITY DIMENSIONS

### Environmental
- Continuous improvement in our Corporate and Social Responsibility (CSR) Strategy
- Encourage our business partners to follow Grecotel Policies and quality Standards
- Meet all relevant legislation

Our impact to the local community is understood and nurtured

### Social
- Discuss with the local community for mutual benefits
- Effectively support the needs of the local community
- Respect the protect the internationally proclaimed human rights
- Transparency for our business policies and practices

### Economic
- Economic Sustainability focuses on the following major areas:
  - Maximize profit
  - Deliver quality products and services
  - Implement economy of scale
  - Enhance work efficiency
  - Engage local partners
  - Equal employment opportunity

### We believe
- Keep updated policies and procedures
- Ensure that the Green Team has all the required Resources
- establish realistic Green goals for each department
- Follow ISO 14001 Principles
- Set targets on Energy and Water Reduction
- Check if funding / loans are available for investment in new technology
- Encourage staff to put forward their own suggestions for water reduction

### We do
- Provide information through websites and reports
- Communicate constantly with the local authorities
- Make donations to local and international causes and projects
- Encourage Guest and Team Members to donate
- Terminate partnerships where human rights violations or child labor is discovered
- Hire people regardless any personal characteristics
- Training programs for team members

### We will
- Achieve Economic Sustainability by continual enhancements of efficiency and quality of work, as well as maximizing benefits for our stakeholders
- Seek Constantly boosting competitiveness and demonstrating the key role of tourism in the Greek economy.
- Implement a Waste management Framework
- Annual sustainability report
- Compare total and departmental consumption figures with hotel industry benchmarks
- Train staff to make prudent use of environmental indicators and how to maintain equipment for optimum energy-efficiency
- Guest Satisfaction Surveys
- Continue the partnership with the Children’s Smile
- Encourage more internal promotions
- Update and enrich the already existing handbooks (Pre-Arrival, Initial Training and Care)
- Prolong opening season
- New Market opportunities
- Use Satisfaction Questionnaires and Surveys to improve services and be competitive to the market
- improve performance and increase the number of arrivals and overnight stays, while improving the distribution of demand over time.
In 1992, Grecotel became the first Mediterranean hotel group to undertake eco-audits in its hotels according to EU standards and formed an environment and culture department in its head office operations department. The environmental initiatives, including the formation of a unique agricultural department which supplies biological produce to the hotels, have resulted in the Group being honoured with the most prestigious environmental awards worldwide. Grecotel is now a textbook example in leading tourism schools and universities.

Corfu Imperial hotel as member of the Grecotel hotels chain, recognizes the importance the protection of the environment plays in the sustainable development of tourism. Therefore, Grecotel Corfu Imperial implements Environmental Management System which discloses our commitment for the development of a sustainable tourism destination with respect to the environment and the local communities. procedures.

By developing Environmental Management procedures, the hotel defines all the environmental aspects of its operations and has established policies that aim to reduce, minimise and manage its environmental impact, continuously improve its environmental performance and results. Grecotel’s environmental policy covers all aspects of our operation that could cause, or contribute to, a potential impact on the local environment.

The Management is committed to:

- comply with the law, rules and regulations related to the hotel activities and have an impact on the environment.
- evaluate the environmental implications of the hotel activities with the goal to minimize or eliminate any harmful effects.
- take any action needed in order to prevent any form of pollution that will affect the local natural residential environment and the quality of tourism services provided.
- aim for continuous improvement through setting new goals and continual research for improved environmental practices.
- To work closely with local government, authorities and local community in order to integrate local perspectives into environmental protection decision making.

Applications inside the hotels

Grecotel performs eco-auditing in its hotels. On the basis of its findings, improvements have been made in the following fields.

- Waste management (liquid & solid)
• Water & energy saving
• Pollution control
• Production of organic plants, flowers and vegetables in hotel gardens
• Composting
• Sustainable coastal management
• Environmental friendly purchasing policy
• Public awareness & communication (personnel, guests, associates, press)

Applications outside the hotels
Protecting and highlighting natural, historical and cultural locations or monuments.
Natural Environment
• Blue Flags on the beaches of Grecotel hotels
• "Caretta caretta" sea turtle nesting beaches in Rethymno, Crete & West Peloponnese
• Support environmental programmes which protect wild life & natural reserves

Historical & Cultural Heritage
• Ancient Eleftherna, Crete
• Saint Irene monastery, Crete

Agriculture Sector
• Agreco Farm Rethymno, Crete – the showcase of Grecotel agro-tourism
• Promotion of local, organic, traditional products in the hotel restaurants and mini markets
• Technical assistance to local producers

Environmental awareness & training
Environmental awareness is succeeded through:
• Booklets, Information Leaflets, Seminars, Slide Shows, Hotel Brochures, Grecotel Magazine, Eco-cultural animation program for Grecotel Guests & Employees:
• Workshops, Conference, Publications, Case Studies and Lectures in Tourism Schools, Press Conference, Support of NGO’s Training Programs for Local Communities, Institutions, Universities, Suppliers, NGO’s, members of tourism sector

AGRECO: A traditional village farm
In Crete, far away from the busy tourist hubs, the rich traditions of rural life endure. After all, agriculture remains an important part of the island's local economy and the Cretan way of life. As a result, Grecotel’s Agreco farm opened its gates in 2001, near Adele village, Crete. This privately owned 40,000-sq estate is an innovative display of environmentally friendly methods for traditional and modern cultivation and breeding. Agreco was created by Nikos Daskalantonakis, founder of N.Daskalantonakis-Grecotel Group, as part of his vision of offering guests wholesome, farm-fresh produce while supporting sustainable development of rural areas. Especially in Crete, where hospitality has been a tradition since the days of Zeus, welcoming someone into your home is admitting them to your family.

The idea behind it is to educate local farmers and Grecotel visitors about the traditional ways of production and the original Cretan way of living. The overall objective is to give visitors a first-hand experience of the traditional production methods of traditional Greek products, namely olive oil, olives, honey, wine, jams, local herbs. Agreco also serves as an educational institution, opening new ways for the development of agriculture, so it can progressively convey new environmental ideas to the farmers around Crete.

Agreco produces ecological products which meet all EU standards and are certified with the ISO22000:05, thereby demonstrating that cultivation is possible without the use of chemicals that ultimately pollute the soil, water and our own health.
Grecotel proudly represents a landmark example since the decade of 90s, being the first hotel connection programme with the local production and has established the institution of the contract-based agriculture to strengthen and support the local community along with local farmers and producers to deliver their various goods to Grecotel hotels in the city of Rethymnon. The Agreco project is aimed at preserving Crete's traditional way of cultivating land and therefore has far-reaching cultural implications. A selection of other organic products from smallholders in other regions of Crete supplement the range of products produced under the name AgrecoFarms (cheese, organic blossom and pine honey, organic olive oil, olives, raisins etc. as well as a special line of personal care products made with pure natural ingredients: shampoo, hair conditioner, hair mask, foam bath, hand cream etc.)

Shaped by hand, every stone at Agreco preserves the delicate balance between man and nature, the farm and its buildings stand in perfect harmony with the landscape. A watermill, a wood-burning oven, a wine cellar, workshops depending on the season such as a room for drying aromatic herbs, a large preserving kitchen buzzing with women making preserves from summer fruit or veggies and putting up tomatoes in paste, St.Nicholas church, a mini zoo with animals such as deers, wild goats (kri-kri), rabbits, quails, partridges, pigeons, peacocks, ostriches, donkeys, turkeys, sheep, cows, chickens etc.). The Farm operates from May to November daily.

At Agreco a guest can experience the unique and special programme “Be a Farmer for a day” and the “Young Farmers” for the little ones with seasonal activities such as:

- Learn to cook and prepare stuffed vegetables (tomatoes, peppers, zucchini)
- Make farmhouse bread and bake it in the wood-burning oven. Try it fresh from the oven, dipped in virgin olive oil.
- Pick vine leaves to make the famous Greek dolmadakia.
- Pick fresh vegetables from the organic gardens to enjoy later.
- Collect hen eggs to make village-style scrambled eggs.
- Milk the goats.
- Help shearing the sheep.
- Taste the fresh milk and see how local cheese is made.
- Make Cretan cheese pies.

é and at the end of the day, when guests brief farming career comes to an end, guests can sit back at the farm’s Taverna with dramatic views over vineyards, olive groves and the sparkling Aegean sea and enjoy a healthy and nutritious Cretan menu. Only fresh, organic farm produce is used in the menu and the preparation is done entirely in the farm kitchens.

Agreco forms a successful sustainability case on its own that:

- successfully interconnects primary sector with tourism
- continues Cretan tradition
- is a unique example of Cretan hospitality
- connects with participation and disseminates at local events, school visits, media visits, conferences, events etc.
- supports small local producers
- supports local community by being a significant employer
- represents at its best and develops Crete’s unique culture, history
- shows the local cuisine and strengthens the Cretan gastronomic identity
cooperates with local and regional Authorities

ENVIRONMENTAL PROGRAM
Grecotel Environmental Program was used as an example in the publication Agenda 21 for the Global Travel & Tourism Industry. It includes activities inside and outside the hotels and it focuses in 4 Key Performance Indicators (KPI)

- Energy
- Water
- Waste and Recycling
- Chemicals

ENERGY
Energy consumption is the main contributor to direct and indirect GHG emissions which affect the climate change. By creating the necessary infrastructure and using the latest available technology in energy management, we endeavor to reduce our energy consumption and maximize the use of renewable energy. Advanced materials and systems are installed in the buildings of o to reduce energy consumption. These include:

- Energy-efficient window panes
- A high-quality, external wall insulation system that significantly reduces energy losses by wrapping the building in a thermally resistant envelope
- Low energy technology lighting
- Electronic lighting ballasts
- Central lighting control systems

Energy Saving measures

Energy Savings from cooling
- Reduce external loads from incident solar radiation by providing proper shading of the building
- Replace window frames that form a cold bridge, and/or install double glazed windows, to reduce cold transfer coefficient
- Obtain increased efficiency through proper maintenance of the Cooling system
- Use natural cooling techniques
- Use Night ventilation techniques, ceiling fans

Energy Savings from lighting
- Use improved fluorescent lamps
- Use super metal halide fluorescent lamps
- Use electronic fluorescent ballasts
- Use improved luminaries
- Motion sensors, timing devices
- Provide information and warning labels for guests and staff
- Use daylight effectively within the building
- Public awareness and communication

Energy Savings from equipment
- Use high-efficiency equipment when replacing old equipment throughout the hotels (including in kitchens, offices, laundries, etc.)
- Electric magnetic keycards for the automatic interruption of lighting and electrical appliances (except refrigerator)

Training - Awareness
- Training to our staff for the best working practices in how to save energy
- Housekeeping Training We train housekeepers in how to reduce both water, and energy consumption.
- When entering guest bedrooms, amongst other things, housekeepers should:
- Turn off all appliances such as TVs
- Allow natural sunlight in
- Turn off the air conditioning, or adjust to a reasonable temperature.
Promote Customers Participation

Customer contribution to reducing Energy consumption and succeed the Energy goals. Customers are informed about Hotels actions and they are welcome to participate. Notices with ways to help the Hotel succeed its energy goals are left inside the rooms.

- Please the Lights off when not in use
- Please remember to close all windows and doors when heating or air-conditioning is on

- It is our policy to change linen every 3 days. Should you wish for your linen to be changed more frequently, please let us know by placing this card on the pillow in the morning.

Promote Employees Participation

All the employees are trained in how to reduce both water, and energy consumption in their working area.
ENERGY INDICATOR

The main energy consuming consumption sources in a hotel are:

- cooling rooms,
- lighting,
- hot water use and other energy consuming activities by guests,
- preparing meals
- swimming pool,
- others

The relative importance of the different energy end-uses is described as follows: Air conditioning (heating/cooling, ventilation) is the largest single end-user of energy in hotels, accounting for approximately 50% of the total consumption. Hot water usage is the second largest user, accounting for up to 20% of the total energy demand. Such as catering and laundry also account for a considerable share of energy consumption, (15%). 10% per cent is used for lighting.
WATER

Water scarcity is a recognised global problem, with demand for water projected to exceed supply by 40% by 2030. The implementation of a sustainable tourism development is directly linked with the availability of water resources in the local area and their management. Water quality and availability are considered to be a major sustainability risk that is being addressed through the implementation of appropriate short and long-term policies.

The quality of water is monitored in cooperation with accredited laboratories. At the same time, continuous efforts are made to reduce water needs Grecotel following all the national and international legislation ensure that the source of the water does not affect the local supply or local environment in any way. All waste water, including rain water are disposed of in a controlled way in order to protect areas lying outside the boundaries of a property from becoming contaminated by water, chemicals, pollutants, effluent and other materials.

Measure Water Use

The first step was to start measuring water consumption and set some tangible targets. It's vital to know our start point (baseline year) and find out how much water is consumed and how it is divided among the various uses such as in the guest rooms and common areas.

Identify, Evaluate, and Select Efficiency Measures

Precise and extensive measurements reveal opportunities for reducing water use and provide the foundation for developing a strategy. It is important to evaluate and rank the various options in terms of cost-effectiveness and qualitative factors such as the impact on the guest experience. Ideally, the selected measures will have a good return on investment and have a neutral or positive impact on the guest experience.

Plan, Implement, and Monitor

Creating a plan that details the hotel water use profile and identifies the targeted areas for efficiency improvements in those uses along with expected costs and benefits will help guide implementation. After the selected efficiency measures are put into action, it is important to monitor changes in water use.

WATER SAVING MEASURES

A series of water-saving measures have been applied, based on best available practices that focus on consumption monitoring (e.g. leak control, improved efficiency), including educational programs for visitors. Below you can see the most important actions taken in order to reduce the Water consumption per area.

Bathrooms

- Flow restrictors to showers, taps and flushes
- Maintenance

Laundry

- Run the washing machine only with a full load.
- Check regularly for leaking dump valves, ensure that all water inlet valves are closing properly and check that level controls on water reuse tanks are working properly
- Use the correct amount of soap to load size so extra rinsing is not required.
- Ensure that the water flow rates are adjusted to the manufacturer's recommended setting
- When buying washing machines, look out for a good water consumption rating
Where outsourced, ask your supplier what procedures they have in place to reduce water and energy use.

Swimming pools
Swimming pool can increase fresh water consumption up to 10%. These steps will help ensure no water is wasted.

- Conduct regular maintenance to prevent leaks. Checking for leaks is best done by reading water meters last thing at night and first thing in the morning.
- Backwash the swimming pool every two to three days rather than daily.
- Push-button showers by the pool to reduce water use.

Watering
Corfu Imperial hotel is located on an area of approximately 70 acres, of which about 17% is occupied by gardens. About 13% is covered with natural turf while the remaining 4% consists of flowering plants and various trees.
To cover the hotel’s gardening needs in the hotel, stalled pipes and pop ups with mp rotators are used.
The hotel is divided into 4 zones and each living is controlled by its own program. Start times are different, with the first starting at 21:15 and last stopping at 6:30 at dawn. Starting time varies regularly depending on differences in external conditions (temperature, air and sunshine).
For Gardening purposes Irrigation water is used.

Kitchens
- Taps in kitchens should have a maximum flow of 10 litres per minute.
- Only use dishwashers on full load.

Housekeeping
- Procedures in place and training to inform housekeeping on how they can reduce water use.
- Adhere to hotel reuse linen/towel program to reduce laundry.
- Make sure linen/towel changing cards and other water conservation cards are in place for guests to find and easily read.
- Minimize water use during the room cleaning wherever possible.
- Turn off the tap during cleaning if not being used for cleaning purposes.
- Flush the toilet only when necessary during cleaning.
- Report leaking faucets and showerheads to maintenance immediately.
- Report running toilets and toilets that flush poorly or have other issues.

Promote Customers Participation / Awareness
We give the opportunity to our guests to reduce the water consumption.
- Turn off the tap when you brush your teeth i this can save 6 litres of water per minute.
- We have place a system displacement device in your toilet cistern to reduce the volume of water used in each flush.
- Take a shorter shower. Shower can use anything between 6 and 45 litres per minute.
- Follow our washing towels policy. It is our policy to change linen every 3 days. Should you wish for your linen to be changed more frequently, please let us know by placing the blue card on the
pillow in the morning

- Give for washing only the really necessary clothes
- Avoid filling the bathtub with water whenever you want to take a bath. It’s preferable to take a shower and install water saving shower heads.
- Check faucets and pipes for leaks regularly. A small drip from a worn faucet washer can waste many liters of water daily
- Check the water flow in every tap. Make sure it’s not too high. If you install flow restrictors, can save approximately half of the water you use.

Promote Employees Participation / Awareness

Strategies to improve water savings will require staff participation to be successful. We have Communicate the management’s commitment to water reduction and the subsequent objectives and goals to all employees.

Keeping staff informed of water savings efforts, asking them to share ideas and take leadership, and ensuring staff feel invested in and responsible for reaching efficiency goals help maximize the impact of efforts.
Calculating the water used per guest per night by dividing the total water consumed in guest rooms by the number of guests for that month gives a more clear image regarding the real consumption of the hotel. The Total Consumption has been decreasing the last years.
Water Consumption per Source 2017 (Lt)

WASTE - RECYCLING

In Corfu Imperial Hotel understand the importance of waste management and its effect on the environment. We are committed to minimizing waste production by employing Reduction, training, and Recycling techniques at every stage of our operation. We are committed to ensuring that all operations and activities are fully compliant with all current waste management policy. We aim to reduce the amount of waste we create to as little as possible. Some waste is unavoidable, but we can still make a positive difference to the environment. The integrated waste management system has been designed on the principles of waste reduction, reuse and recycling. Waste is separated into the following types: paper, plastic, glass, used oil, batteries, cartridges.

WASTE MANAGEMENT MEASURES

- Corfu Imperial is connected to water drilling.
- Recycle glass, plastic, papers, lamps, electrical devices.
- In Grecotel we separate waste according to local authority guidance. Separate Bins: In order to recycle aluminium cans, glass bottles, separate bins could be made available in the kitchen and bar so that these items can be easily recycled.
- Soap Dispensers: Refillable liquid soap dispensers are used in the public toilettes and in the kitchens instead of soap bars. This minimizes waste by not needing to throw away used soap bars.
- We return: glass bottles for water, beer, soft drinks, wine, plastic water bottles, pallets, beer barrels etc.
- All quantities are reported annually.

Control of pollution of natural resources

- The hotel's liquid waste is treated in the local wastewater treatment plant of the Municipality.
- Regular chemical and microbiological analyses of water (drinking water, sea & pool water) are conducted by a certified laboratory.
- All cleaning agents and detergents are selected according to environmentally friendly standards regarding their composition, packaging and usage.
- All the refrigerant substances used in the hotel are ozone friendly (compliant with the international legislation).
- We implement the HACCP and the ISO 22000 food and hygiene safety management system.

Grecotel is committed to the sustainable management of our operations in a way that reverses land degradation while protecting and preserving the ecologically important habitats surrounding the existing and future sites. The sea, apart from a significant tourism asset, particularly important for Greece, is a key natural resources provider and a major carbon sink contributing to the mitigation of climate change. The coastal areas support numerous human activities vital for the development and the coherence of human societies.

Promote Customers Participation

Customers can help the Waste management plan by: keep saving our environment by always using the recycle bins.

Promote Employees Participation

Employees are required to:

- become familiar with the type of waste and their appropriate handling and disposal methods, and...
• adopt the procedures for waste separation using the correct color coded bags and bins.

Objectives
• Categorization of the different types of waste
• Identify areas of waste production throughout the hotels.
• Employ effective waste management practices to identify the most efficient methods to reduce the production of waste.
• Manage the process to ensure compliance with best practice.
• Through training and support, ensure that all staff are aware of their responsibilities under Grecotel environmental policy and how compliance can be achieved and maintained.
We recycle: paper, plastic, glass, batteries, electronic equipment, used cooking oil, ink cartridges.
HAZARDOUS SUBSTANCES USAGE

The environment is totally affected by the hazardous substances. Corfu Imperial keeps a list of all hazardous substances used (e.g. chemicals, hazardous materials, light bulbs, batteries, ink/toner cartridges etc.)

All hazardous substances are used safely according to the manufacturer instructions and are stored safely, in line with national and international standards.

Chemicals are disposed safely, in line with national and international standards and collected by a fully licensed contractor.

The usage of chemicals is limited and only from special trained staff members. All the employees who handle any chemical products and substances receive an annual training regarding the correct use of the chemicals (quantity, required personal protective equipment) and the possible harmful effects.

In Grecotel we recognize Corporate Social Responsibility, significant importance within the industry, as well as in the media and among consumers.

We regard direct or indirect discrimination, victimization and harassment as a serious matter. Employees who fail to comply with this policy will be subject to the Company’s disciplinary procedure. All breaches of this policy will be regarded as serious disciplinary matters and will, if there has been victimization, intentional discrimination or deliberate harassment be regarded as potential gross misconduct leading to summary dismissal.

Grecotel recognizes that misunderstandings can arise where people of a different sex, interests and cultures work together. Any employee who believes that he or she is being treated in a way that is contrary to this policy should raise the issue with their Department Manager. If an employee feels that it is inappropriate to approach their Department Manager he or she may contact the Human Resources Department.

The Human Resources Department, carries out a periodic review of Grecotel’s equal opportunity policy and monitors the effects and the application of this policy across the company.

**EMPLOYEES**

The main concern of Grecotel all these decades is the uninterrupted support of the Company for the professional and personal development of all employees, but also to make them contributors to the overall vision of Grecotel. Indicative benefits of Grecotel for its staff are the blood bank, continuous performance management through training and development programs, trips abroad, residence for staff, bonus program, special rates when staying in company’s hotels and providing loans.

All our employees receive extensive training in order to develop their skills and take an active role in promoting a culture of contribution to sustainable development. Our employment policies promote an inspiring, safe and secure working environment for all, safeguarding equality and eliminating discrimination based on gender, religion, nationality or sexual orientation.

- A mentor is taking care every new member
- We provide them with three different handbooks which explains in details all the aspects of their profession.
- Weekly food Programme, Breakfast, Lunch, Dinner
- Separate closets and staff toilets
- We provide opportunities to develop new skills, e.g. languages courses, winology, barista training, butler service
- Involve staff in hotel operations and invite their comments regarding improvements.
- Encourage seasonal staff to return next year.
- Unusual benefits such as flexible hours, job sharing, pensions, free transfer by hotels bus, blood donation, medical insurance.
- Increase the feeling that they belong to one of the best hotels in Europe and this is a huge plus in their CV.

**Health and Safety**

Corfu Imperial puts the same emphasis on guest safety as it does on its team members. We undertake comprehensive risk assessments following the national and international standards our purpose is to identify the likelihood and the severity of all risks in any place in the hotel and then we put out risk reduction plan.

We are always try to be equipped with all necessary safety tools and signage, we carry out frequent quality checks from internal and external cooperators such TUI Safety control, SGS, Travel life, Grecotel safety team.

During 2017, there were 2 cases of guests injuries and three cases of illness. Our main goal for 2016 is to minimize to zero all these incidents. We also complete the construction of our health and safety handbook that became a general prototype in Grecotel hotels and resort.

**Human Rights**

We support and respect the protection of internationally proclaimed human rights;

All employees are responsible for complying with social policy and for ensuring that the standards of behavior required by the company are observed by:

- Treating others on their merits and disassociating themselves from any form of direct or indirect discrimination, victimization or harassment.
- Bringing to the attention of their Department Manager any suspected working practice in breach of this policy. And
- Working together to promote a harmonious working environment free from discrimination, harassment and bullying.
- Any employee who violates any of the company’s rules or fails to perform to the satisfaction of this Hotel will be subject to discipline. Corfu Imperial always tries to provide the same opportunities to each human and stands on that by all means.

**Creating new job opportunities**

The implementation of a sustainable tourism business model creates new jobs and business opportunities due to its direct links with most of the sectors of the local economy.

**Equal opportunities**

In Corfu Imperial everyone is equal. Any illegal discrimination based on factors such as race, color, creed, national origin, gender, age, disability or handicap, including illegal harassment, is strictly prohibited. A separate harassment policy is included in this handbook.

Corfu Imperial employed 326 employees in 2017. This number is divided almost equally to male
The majority of employees are from Corfu (220) and from other cities in Greece (106).

- We invest in youth! 109 colleagues 18-29 years old
- We trust the middle age! 92 colleagues 30-39 years old
- We learn from the experienced ones! 78 colleagues 40-49 years old
- We respect the older! 47 colleagues 50-64 years old
- The management team consists 23 male and 17 female

Training, development and principles
All our employees receive training to familiarize them with the company's core values and code of conduct and attend thorough training programs in order to develop their skills and enhance their career opportunities. All our associates receive our policies and they are asked to follow the same principles.

Accomplishments youth careers
Corfu Imperial always protects and invests in young people from local tourism schools. We are recognized for our exemplary practices in corporate school practice and responsibility. Every year we give the opportunity to the best students to succeed as professionals in other Grecotel hotel.

PARTNERSHIPS AND DONATIONS
PARTNER WITH "The Smile of the Child" "THE SMILE OF THE CHILD" is a non-profit voluntary Organisation. It is based on sentiment and emotions but it goes beyond that and turns everything it represents into actions. As its main objective, the Organisation deals with the daily problems children encounter.

The Organisation's main concern is defending children's rights, not just on paper but in practice as well, providing services to children on a 24-hour, 7 days a week, 365 days a year basis, working for their physical, mental, and psychological stability.

The Smile of the Child cooperates closely with state authorities (Police, the General Attorney's Office, hospitals etc.) but also with all responsible individuals wishing to contribute to alleviating issues affecting children.

As a voluntary Organisation, the Smile of the Child supports all relevant institutions so as to promote their efficiency in handling children's issues.

LOCAL COMMUNITY
Corfu Imperial growth is directly linked to the prosperity of the destination. Contributing significantly to the local economy and supporting regional development is a key priority.

- We effectively support the needs of the local community and implement initiatives accordingly
- Our impact on the local and wider community is understood and nurtured.
- Dialogue with local communities is encouraged for mutual benefit.

Sustainable tourism creates the necessary momentum for the continuous, inclusive and sustainable economic development of Crete. It creates links with agriculture and service-providing sectors and stimulates the development of key infrastructure (road construction, upgrade of airport facilities) and the provision of financial services from which the local economy as a whole can benefit. The revenue generated by the increase in tourist arrivals in the region has a positive direct impact on a wide range of economic sectors incorporated in the tourism value chain. The positive impact from tourism growth on income and employment in the local
community is multiplied, creating a vibrant local economy. The company applies a policy of preference for hiring locally. In 2016, approximately 15% of our associates at managerial level, including junior & middle management, were hired from the region of Corfu. The local people can use the facilities of the promises with specific cost / charge provided the availability of the resources.

**Promote and Participate in local activities.**

**Source Locally**

“Buy locally is crucial, enabling local communities to benefit from tourism”

We strongly believe that every purchase must cover a real need of the hotel. We mentor our local suppliers so they quickly become part of our regular supply chain and our philosophy. In any negotiation with the supplying company, we inform them about our environmental policy and we ask them to inform us about the various environmental-friendly products on offer.

We give priority to products from the local markets, provided that they meet the requirements and basic needs of the company. As far as the final decision on any purchase is concerned, the important factor of product transportation should always be considered, from the point of view of both air pollution and fuel consumption (non-renewable sources of energy) during transportation.

Priority should be given to recyclable and returnable products as well as those from recycled materials (mostly paper, aluminum, glass, plastic) without excessive multiple.

**Purchase Policy**

In general, preference is given, wherever possible, to the purchase of products in bulk and re-useable or returnable packages. This practice reduces both the cost and the useless packaging that ends up as waste. The purchase of items such as disposable cocktail decorations, breakfast portions, glasses, etc. is to be avoided and, wherever their use is necessary, biodegradable products are preferred. Among the artificial and chemical products of everyday use, preference is given to those with the least damaging effects on the environment and human health.

The use of materials containing substances dangerous to public health and the environment (such as organic solvents, asbestos, lead, polyurethane, etc.) should be avoided in the construction of buildings, manufacturing of furniture, insulation & decoration during renovations.

**CLIENTS**

Guest satisfaction

We believe that the satisfaction, security, safety and open dialogue with our clients, is absolutely necessary and desirable. Client Satisfaction

Economic dimension refers to the way in which the company organises its position in the marketplace to actively develop its sustainable profile by using its economic stability and profitability for continuous improvement. Our long-standing commitment to responsible business helps to create opportunities for all the interested parties, including our associates, guests, hotel owners and local communities. We continue to drive meaningful results benefiting youth, global diversity and inclusion, health and wellness, responsible sourcing and support for human rights.
The majority of our guests in 2017 came from Europe (19.10% from Greece and 72.90% from the rest of Europe). There was an increase in guests from Americas/ Rest of the World. The occupancy rate was 80% during the Season. July and September reached 100% occupancy rate.
07

ANNEX
Environmental Policy Statement Grecotel

In Grecotel, we recognize the impact of our business on the environment and we are committed to ensure environmental sustainability. We comply with all applicable environmental regulations and use environmentally friendly business practices. Grecotel is committed to:

- operate in compliance with all relevant environmental legislation
- formulate and implement an Environmental Program to improve the environment for both local people and seasonal visitors, across the spectrum of our activities
- continually improve over time by striving to measure our environmental impacts and by setting goals to reduce these impacts each year
- make frequent Environmental measurements (noise, energy and water consumption) and undertake regular environmental audits
- Increase the level of awareness of environmental issues to all the interested parties (customers, staff, suppliers, local community etc)
- train all of our staff on our Environmental Program and empower them to contribute and participate
- Innovate, concerning resources, reducing emissions and climate protection
- use local, natural, raw materials & recycled products
- support International and National environmental organizations (NGOs)
- Include environmental considerations in new building and renovation plans
- emphasize the conservation and protection of the landscape, wildlife and historical resources near each hotel

Green Team is responsible to ensure the implementation of environmental measurements and initiatives for each hotel. The Environmental Manager is responsible for the proper function of the Environmental Program and to communicate this policy to all staff and customers. The entire staff is responsible to promote, support and implement the Environmental Program through their daily work.

The Managing Director is committed to provide all the necessary means for the proper operation and the constant improving of the Environmental Program.
Corporate and Social Responsibility Policy

In Grecotel we recognize Corporate Social Responsibility, significant importance within the industry and among consumers. The Policy sets our social priorities and principles. We are committed to:

- Implement in accordance with CSR strategy and Continuous improvement
- Encourage our business partners to reach company's standards;
- comply with all relevant national and international legislation aiming to apply internationally acceptable best practices in every aspect of our operations

Ethical Business Conduct in order to ensure

- fair treatment of all employees and clients
- transparency of our business policies and practices
- high standards relating to health and safety in the working environment
- ethical business practices throughout our operations

Human Rights

- Support and respect the protection of internationally proclaimed human rights;
- Vendors are actively encouraged to observe international human rights norms.

Impact on Society

- We effectively support the needs of the local community
- Our impact on the local and wider community is understood and nurtured;
- Dialogue with local communities is encouraged for mutual benefit.
- Respect the local culture, traditions and intellectual property rights.

Equal Opportunities Employer

- Provide equal opportunities to all employees and job applicants.
- No job applicant shall receive less favorable treatment on the grounds of sex, age, marital status, sexual orientation, race, color, religion or belief, nationality, ethnic or national origin.
- no discrimination relating to employees and job applicants with special needs such as disability or part time or fixed term status unless this can be justified.

Child Protection Policy

- promote Human Rights, and in particular children's rights by training staff and providing information to clients;
- reject, eradicate and condemn any form of exploitation of human beings, especially of a sexual nature, particularly when this affects minors.
- The Company does not utilize or promote forced or child labor Managing
Grecotel Quality Policy

In Grecotel we recognize that Quality management system has internal and external benefits. Service quality is understood as a given ability to satisfy its clients' expectations to the highest standard. In Grecotel we are committed to

- satisfy the current legal and other requirements
- Identify and understand our customer's expectations, measure customer perceptions, and implement improvements to increase customer satisfaction. The effectiveness of our services and guest satisfaction is monitored through our own guest questionnaires, through our operators' feedback and management/staff meetings and reviews
- Deliver on-time and on-quality products, systems and services that meet or exceed our customers' expectations.
- To improve motivation of our employees,
- To improve our employees by giving them training regularly on sense of quality, hygiene and food safety,
- Embed social responsibility and company ethics policies in our business practices.
- To assure the quality and safety of our raw materials
- improve operational performance along the value chain from suppliers to customers
- continually improve its services in order to attain the maximum quality level required by our guests.
- To make the quality measurable, to determine the objectives in order to ensure continuous improvement

All senior and other employees have been made aware of our operational objectives targets and practicing standards applicable to this quality policy. All of them have been informed of this quality policy, procedures and instructions defined within General manager is responsible for the hotels quality system. Their main duties include: orientation at results and the client, leadership and repeatability of actions oriented at completion of pro-quality ventures, management through processes (with the help of, among others, such tools as: guests' comments, weekly walks, health-and-safety-at-work regulations), development,
Purchase Policy

Purchasing decisions can have significant environmental social and economical impacts. Responsible procurement (or sustainable/responsible purchasing) is a process by which environmental, social and ethical considerations are taken into account when making a purchasing decision. Grecotel considers the following parameters:

- Whether a purchase is necessary: Every purchase must cover a real need of the hotel whilst taking into account the hotel category.
- What products are made of: Priority should be given to recyclable and returnable products as well as those from recycled materials (mostly paper, aluminium, glass, plastic) without excessive multiple packaging (the more complex a product is, the more materials are used in its production and the more waste is disposed of into the environment).
- Under what conditions they have been made.
- How far they have travelled: important factor of product transportation is always considered, (air pollution and fuel consumption (non-renewable sources of energy)
- Their packaging components; Purchase of products in bulk and re-useable or returnable packages. This practice reduces both the cost and the useless packaging that ends up as waste.
- How they will be disposed of. Among the artificial and chemical products of everyday use, preference is given to those with the least damaging effects on the environment and human health.

Priority will be given to products from the local markets (on a regional, area and state level) provided that they meet the requirements and basic needs of the company

Regarding the purchase of equipment, priority is given to the products that consume less water, energy and fuel and do not contain CFCs.

The Environmental Friendly specifications are determined by Grecotel's Environmental Department in cooperation with the Purchasing Department on the basis of specific European Union and international regulations, as well as scientific information on the respective subjects.
Grecotel Children Rights Policy

At Grecotel, we are aware and responsible for actively safeguarding children from any form of abuse which may include neglect, physical, sexual or emotional abuse, hunger, mistreatment or exploitation in any form. We support and respect the protection of human rights within the company’s sphere of influence including standing against human trafficking and the exploitation of children. We publish our Children Rights Policy and provide training on human rights, including the protection of children, for all our hotels’ staff. Grecotel is committed to:

- Respect and promote children’s rights and take necessary measures to protect children against all types of exploitation.
- Adopt preventative measures to stop the preparation or circulation of tourist programs which promote or encourage sexual contact with minors.
- Establish a company ethical policy against the commercial sexual exploitation of minors.
- Report all suspicious circumstances involving children to the local police and child protection agency.
- We provide our staff with training on child protection. All the employees of Grecotel are trained to deal with such matters and always consider our actions very seriously in order to ensure that the child’s best interest is upheld.
- We support all kinds of organizations and activities for the protection of children in our environment THE SMILE OF THE CHILD—a Hellenic non-profit voluntary Organisation
- be actively involved in activities to raise public awareness and awareness about the prevention of violence against children. Provide information to customers through informative material and our website.
- Report annually on the implementation of these points.

Persons who insist on incompatibility despite the warning made by the hotel management and who insist on disturbance are removed from the hotel according to the seriousness of the situation with the approval of the General Manager or notified to the judicial institutions.

All employees must adopt this policy and promise to give the necessary determination and support for its implementation.
